ABOUT ME

I'm a final-year B.Tech student majoring in Artificial Intelligence and Data Science. I have a solid understanding of machine learning, data analytics, and software development. I enjoy using AI to solve real-world problems and have hands-on experience working with Python, data visualization tools, and building machine learning models. I'm enthusiastic about joining innovative teams where I can apply my skills and grow in the tech industry.

SKILLS

- Programming (Python, java)
- Database Management (SQL, NoSQL)
- Data Analysis (Python, SQL)
- IoT Integration (ESP32, Sensors, GSM, GPS)
- Problem-Solving, SQL & Data Handling \
- Data Visualization (Matplotlib, Power BI)
- Machine Learning (supervised, unsupervised learning)

EDUCATION

B.Tech – Artificial Intelligence and Data Science

CARE College of Engineering, Tiruchirappalli, Tamil Nadu

Nov 2022 – Present

PROJECTS

Women's Safety Watch

- **Technologies:** ESP32, MAX30102, MPU6050, GPS, Twilio, Streamlit
- Designed a wearable device to detect abnormal vitals or motion, sending real-time alerts with live GPS location to emergency contacts via GSM module. Integrated with a Streamlit UI for monitoring.

Face Recognition Attendance System

- **Technologies:** OpenCV, Python, Streamlit
- Built a real-time face recognition system to automatically mark attendance. Unknown faces are logged, and a UI built with Streamlit allows admin control, data training, and attendance tracking with timestamps..

IoT-Based Sensor Monitoring & Visualization System

- **Technologies:** STM32H723, ESP32, MCUFRIEND_kbv, Adafruit_GFX, Arduino IDE, Wi-Fi, Database
- Developed an IoT-based embedded system that collects real-time sensor data and transmits it over a Wi-Fi network. Integrated TFT display modules for local output and designed custom communication protocols using STM32CubeIDE. Structured the data flow into a centralized database for monitoring and visualization through a dashboard interface.

Student Attendance Management System

- Created a web application using Flask and PostgreSQL.
- Implemented student data and attendance management

ADDITIONAL ACHIEVEMENTS & CERTIFICATIONS

- Designed and implemented an IoT-enabled real-time monitoring solution for twisted nylon spindle parameters as part of the Industry–Institute Interaction Program, deployed in a live industrial environment at SRF Limited.

LANGUAGES

English, Tamil
